

VACANCY

Senior Analyst – Asset Utilization & Performance

The Barbados Light & Power Company Limited (BLPC) is seeking applications from suitably qualified professionals to fill the position of **Senior Analyst – Asset Utilization & Performance**. Reporting to the Operations Systems Engineer, the successful candidate will monitor and report on the performance of the Generation plant, providing reports, analyses and forecasts to support corporate strategy and decision-making.

Job Duties:

- Supervises personnel in the Asset Utilization & Performance Section
- Responsible for maintaining relevant statistical data and information records in the Generation department
- Monitors fuel and lubricating oil inventories and ensures the preparation of orders to maintain adequate daily supplies
- Monitors the performance of the generating plant and prepares/reviews routine monthly/quarterly reports for internal and external stakeholders. Highlights and assists in investigating anomalies or deviations from expected performance values
- Ensures that all controls within the scope of the Performance Section related to the ordering, receipt and payments for fuels, lubricating oils and water are adhered to. Also, ensuring accuracy of supplier invoices and liaising with internal and external auditors regarding compliance with controls
- Prepares short, medium and long-term forecasts for energy production, fuel and lubricating oil consumption to facilitate the analysis and comparison of expansion scenarios, strategic planning and budgeting. Also provides forecasts to facilitate suppliers planning and logistical considerations
- Develops and maintains spreadsheets and databases to facilitate operational data collection and performs calculations related to plant performance including but not limited to heat rates, efficiency, availability, reliability and other performance metrics
- Performs monthly reconciliation of energy production against fuel and lubricants consumption to specify cost allocations to the appropriate cost centres and facilitate the determination of the monthly Fuel Clause Adjustment
- Researches information and provides analyses and forecasts for various operating parameters as required, by developing appropriate spreadsheets/analytical models to facilitate such
- Responsible for the monitoring and reporting of the Corporate Key Performance Measures and the Balanced Scorecard systems
- Participates in the development and continuous improvement of the Corporate Key Performance Measures

Qualifications and Experience

- A University Degree in a Social or Applied Science (e.g. Accounting, Economics), or a related field
- An Associate Degree in Mechanical or Electrical Engineering or a related discipline would be an asset
- Proficiency in the use of the Microsoft Office Suite and analytical software tools
- At least four (4) years of experience in a similar role
- Supervisory Management certification

Remuneration

In return, we are offering an attractive compensation package, including Group Life Insurance, Medical Coverage and Group Pension.
